The possible directions of use of the scientific newspapers and scientific journals

The possible directions of use of the scientific newspapers and scientific journals

- For the complex analysis of the difficult objects, processes or phenomena
  - Propagandize the complex system analysis of the difficult object, process or phenomenon, and then allow to define the subject areas for the scientific justification of the revealed dependences
- For the system analysis of the information-educational environment
  - Propagandize the system analysis of the information-educational environment for the creation and increase of efficiency of functioning of the automated training system
- For the financial analysis of the enterprise or (credit) organization
  - Propagandize the financial analysis of the efficiency of functioning of the organizational structure based on the data of primary financial reporting and results of activity

Prepared my personal monography "The environment of automated training with the properties of adaptation based on the cognitive models", 2005; deposited in "RAS", 2007; given to "RSL", 2008
